Post and panel signs

Perfect for areas where fixing a sign is not possible. Post and panel signs provide an effective and professional way to give your practice presence.

Monolith signs

If there are grounds outside your premises we can install a free standing sign to make your location much more visible.

Inside

Internal signs can be stylishly blended into the overall layout and design of your premises to give directions, safety advice and general information.

Reasons to use signs now

We promise to supply you with quality signs and peace of mind:

- We can make all your sign requirements in house – so we have complete quality control
- We have ISO 9001 accreditation for our detailed quality system
- All our signs undergo a rigorous quality inspection before they are despatched
- We employ our own installers and they are all highly trained on health and safety
- Installing signs can be a risky business but you can be assured that our safe working is approved by CHAS, SAFE Contractor and Constructionline
- We carry a high level of insurance for product and public liability
- We are a member of the International Sign Association and we feel bound by their ethics and standards.

And that is why we are the only sign maker who will give you a 5 Year Guarantee on your signs.

Tips for buying signs

1. As with most things **you get what you pay for**. If the image of your business is important to you then you need to consider paying good money for good signage. There are plenty of low budget options available if that is all you need.

2. No two signs are ever the same. You will get variations in size, colour, materials, fixing method, location, etc. We can imagine that a sign could be fitted for as little as £500 or for as much as £5,000. It is better if you tell us what budget you are willing to spend and then **we can offer you an effective solution inside your budget.**

3. As the person responsible for your premises **you are responsible (and liable) for the safe installation of your signs and their safe location.** If the sign should ever fall down you could be the one in trouble – so please take care in the choice of a professional sign supplier.
