

## **Broadwalk Shopping Centre, Bristol.**

Broadwalk Shopping Centre in Bristol is a long established shopping destination based on the south side of the city and is a centre for the local community also staging events. Signs Now have been supplying all types of signs to Broadwalk for the last 13 years, and during that time we have developed a close working relationship based upon trust, efficiency and the supply of good quality signs. We have undertaken signs not only for the centre itself but for several of the actual shops within.

Each sign enquiry is usually dealt with by face to face meetings surveying their potential requirements. We then discuss the best and most effective ways of producing the signs which are then installed by in-house fitters.

Being a shopping centre all signs not only need to be visually appealing, clear and informative, but particular attention needs to be paid to making the signs durable and robust using things like anti-graffiti coatings where required.

Over the years, we have produced a whole multitude of signs including simple vinyl graphics, directional signs, health and safety signs, banners, aluminium and acrylic wall signs, large bespoke freestanding and projecting signs as well as fascia signs. Having in-house production capabilities makes the supply of large bespoke signs possible and means we can keep control of larger projects.

When working in and around a shopping centre we need to adhere to safe working practices, providing risk assessments and when required only working when there are no members of the public nearby. We sometimes need to work at height and have trained and qualified fitters capable of doing so.

As Tim Maloney the Centre manager says, "I would like to take this opportunity to say thank you to Jerry and the crew at Signs Now for all the help and advice over the years during our refurbishments and re-branding work. We have used you for a number of years now and have always received a first class service with a prompt response and fast turnaround".
